ECLIPSE SHADE SYSTEMS

MORE TIME OUTSIDE.
MORE WAYS TO ENJOY IT.

OPENING + RETRACTABLE ROOFS | SUN LOUVRES | SHADE SYSTEMS

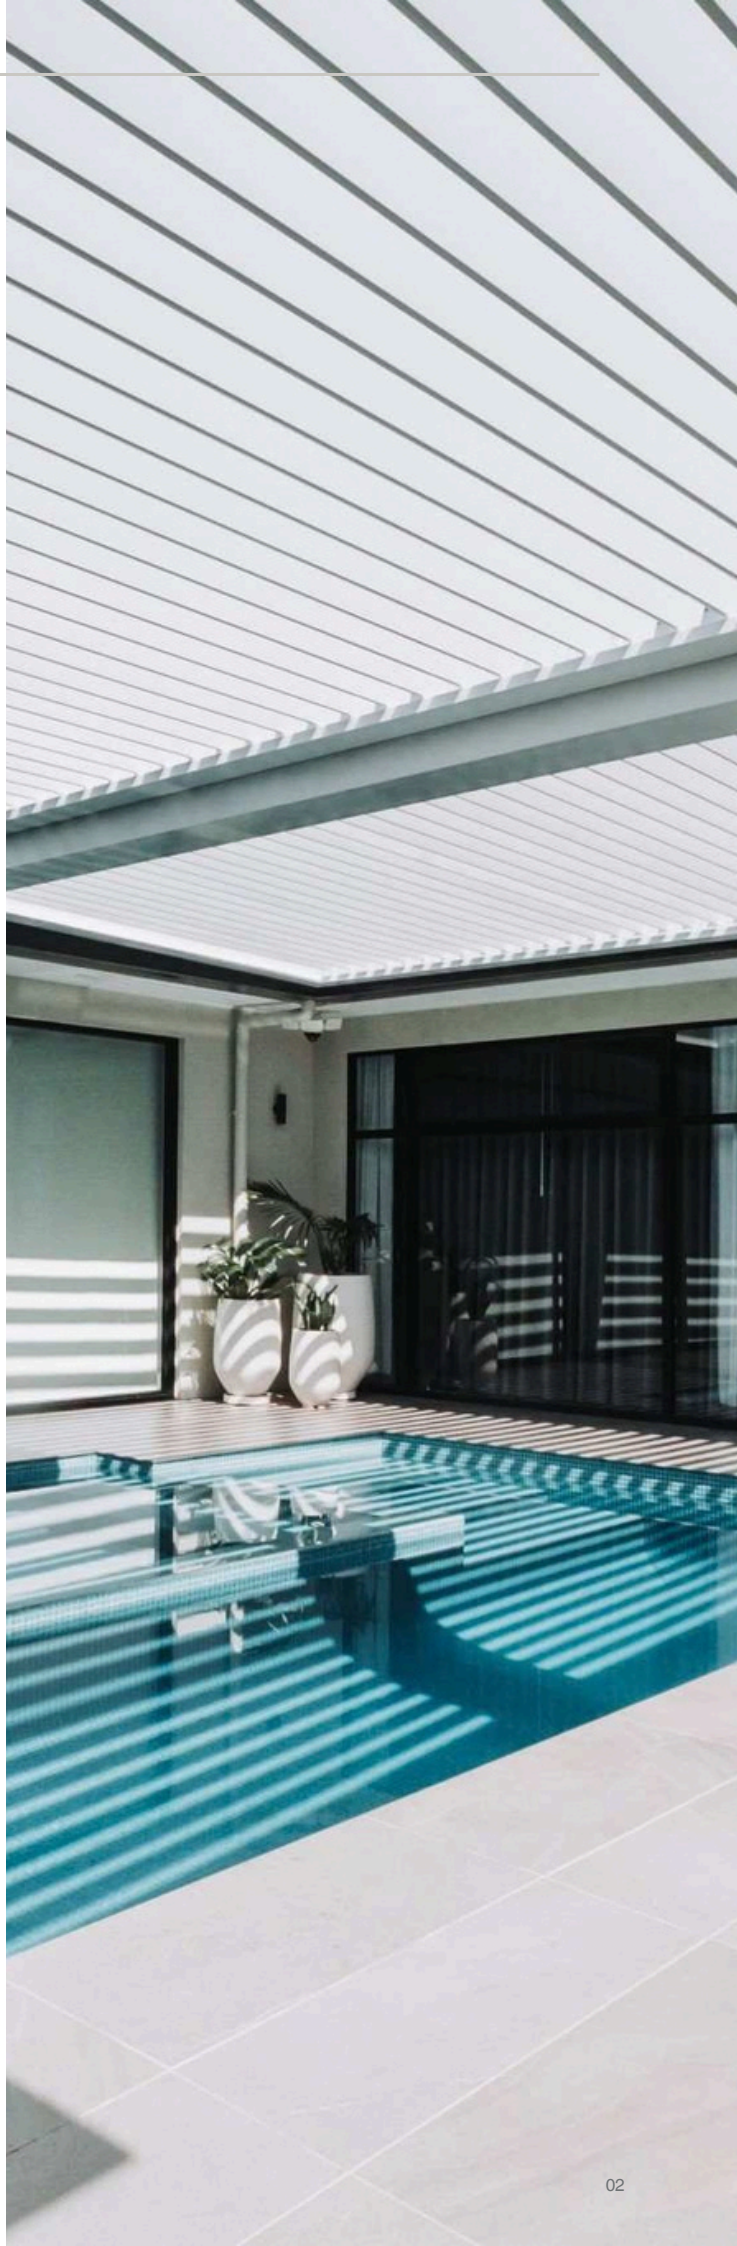

OUTDOOR LIVING, ON YOUR TERMS.

Eclipse Shade Systems designs and installs premium opening roof, louvre and shade systems for residential and commercial properties across South Australia.

Our systems give you greater control over sunlight, shade, airflow and protection from changing weather, with each project designed around the property and how the space will be used.

DESIGNED FOR SOUTH AUSTRALIAN CONDITIONS

- Premium aluminium systems
- Custom designed for the property
- Residential and commercial applications
- Experienced installation
- 10 year structural guarantee
- 35+ years of combined experience in louvre systems

HOW IT WORKS

Adjust the louvres to suit the moment.

CLOSED FOR RAIN

Interlocking louvres close to provide protection from the weather, with deep channels directing water to the surrounding gutter.

PARTIALLY OPEN

Open the louvres slightly for airflow and shade while still allowing some natural light through

FULLY OPEN

Let in maximum natural light and warmth during cooler weather.

ANGLED OPEN

Angle the louvres for shade while allowing light and natural ventilation through the space.

MAKE THE MOST OF THE WINTER SUN

With the right orientation, Eclipse louvres can be angled to reflect winter sunlight through nearby windows and doors, bringing natural light and warmth into your home. Adjust the angle throughout the day to make the most of the changing sun.

OPENING ROOF SYSTEMS

More control over your outdoor space.

Eclipse Opening Roofs use adjustable aluminium louvres to control light, shade, airflow and shelter at the touch of a button.

Open the louvres for sunshine and fresh air, angle them for shade and ventilation, or close the roof when you need protection from the weather.

IDEAL FOR

- Alfresco areas
- Poolside spaces
- Outdoor dining
- Residential projects
- Commercial spaces

SUN LOUVRES

Shade where you need it, without closing off the space.

Eclipse Sun Louvres help manage direct sunlight, heat and glare while maintaining natural light and airflow.

Installed vertically or horizontally, they can be used across windows, facades and outdoor areas for shade and greater privacy.

APPLICATIONS

- Windows and glazed areas
- Outdoor living spaces
- Privacy screening
- Apartments and multi-residential
- Commercial buildings

EXTERNAL BLINDS + PRIVACY SHADES

Add another layer of protection from sun, wind and changing conditions while keeping outdoor areas comfortable and connected.

AUTOMATION + LIGHTING

Make your outdoor space easier to use.

Motorised controls make it simple to adjust your roof or louvres as conditions change. Depending on the system, weather sensors can also be incorporated.

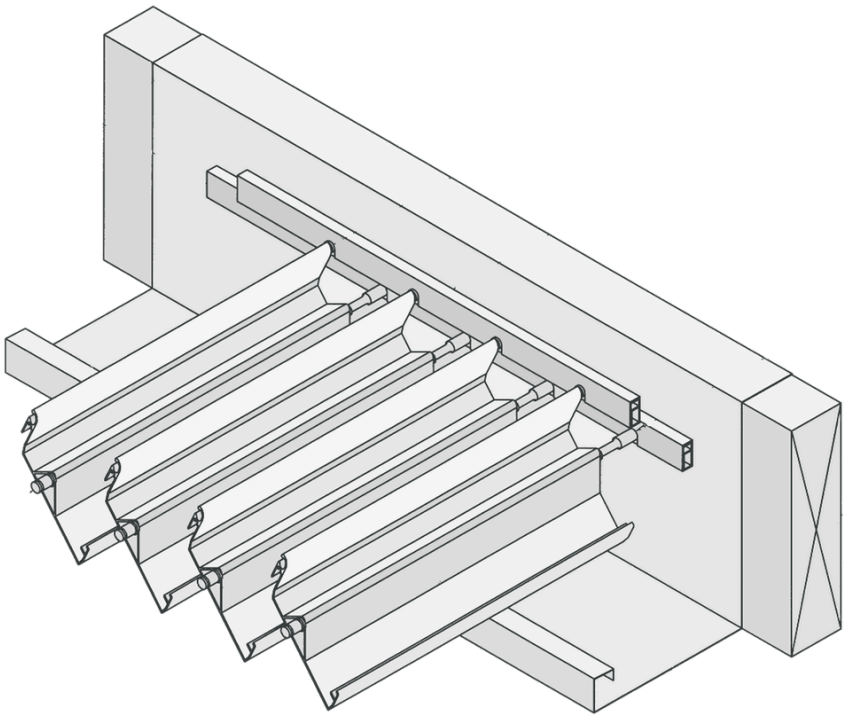

Integrated lighting can be planned as part of the system, helping the space work just as well after sunset.

OPTIONS MAY INCLUDE

- Remote control
- Rain sensor
- Home automation connection
- Integrated LED lighting

BUILT PROPERLY

The details behind the system.

Built for long-term outdoor use.

Eclipse Opening Roof systems use solid extruded aluminium louvres with Marine Grade Aluminium and 316 stainless steel components for a high level of corrosion resistance.

Louvres are powder-coated or anodised for long-term outdoor use, while the surrounding support structure is engineered to meet the requirements of each individual project.

SYSTEM DETAIL

- Extruded aluminium louvres
- 316 marine-grade stainless components
- Powder-coated or anodised finishes
- Integrated guttering and drainage
- Engineered support structure
- 10 year guarantee on the louvres

Technical specifications are subject to project design, engineering requirements and selected system.

NEED MORE THAN THE ROOF?

For projects that extend beyond the Eclipse system, our team can also bring in the expertise of Bespoke Outdoor.

Bespoke can manage the surrounding design and construction works, giving you a more complete approach when the project involves more than an opening roof, louvres or blinds.

BESPOKE OUTDOOR CAN HELP WITH

- Verandahs and pergolas
- Decking
- Outdoor kitchens
- Screening and privacy
- Integrated lighting and heating
- Surrounding building works

WHY ECLIPSE

BUILT FOR THE WAY YOU USE THE SPACE.

EXPERIENCED ADVICE

We have 35+ years of combined experience in louvre systems. We look at the property and recommend a system based on the space, not simply a standard product.

CLEAR COMMUNICATION

You'll know what's happening, what comes next and who to speak to throughout the project.

QUALITY INSTALLATION

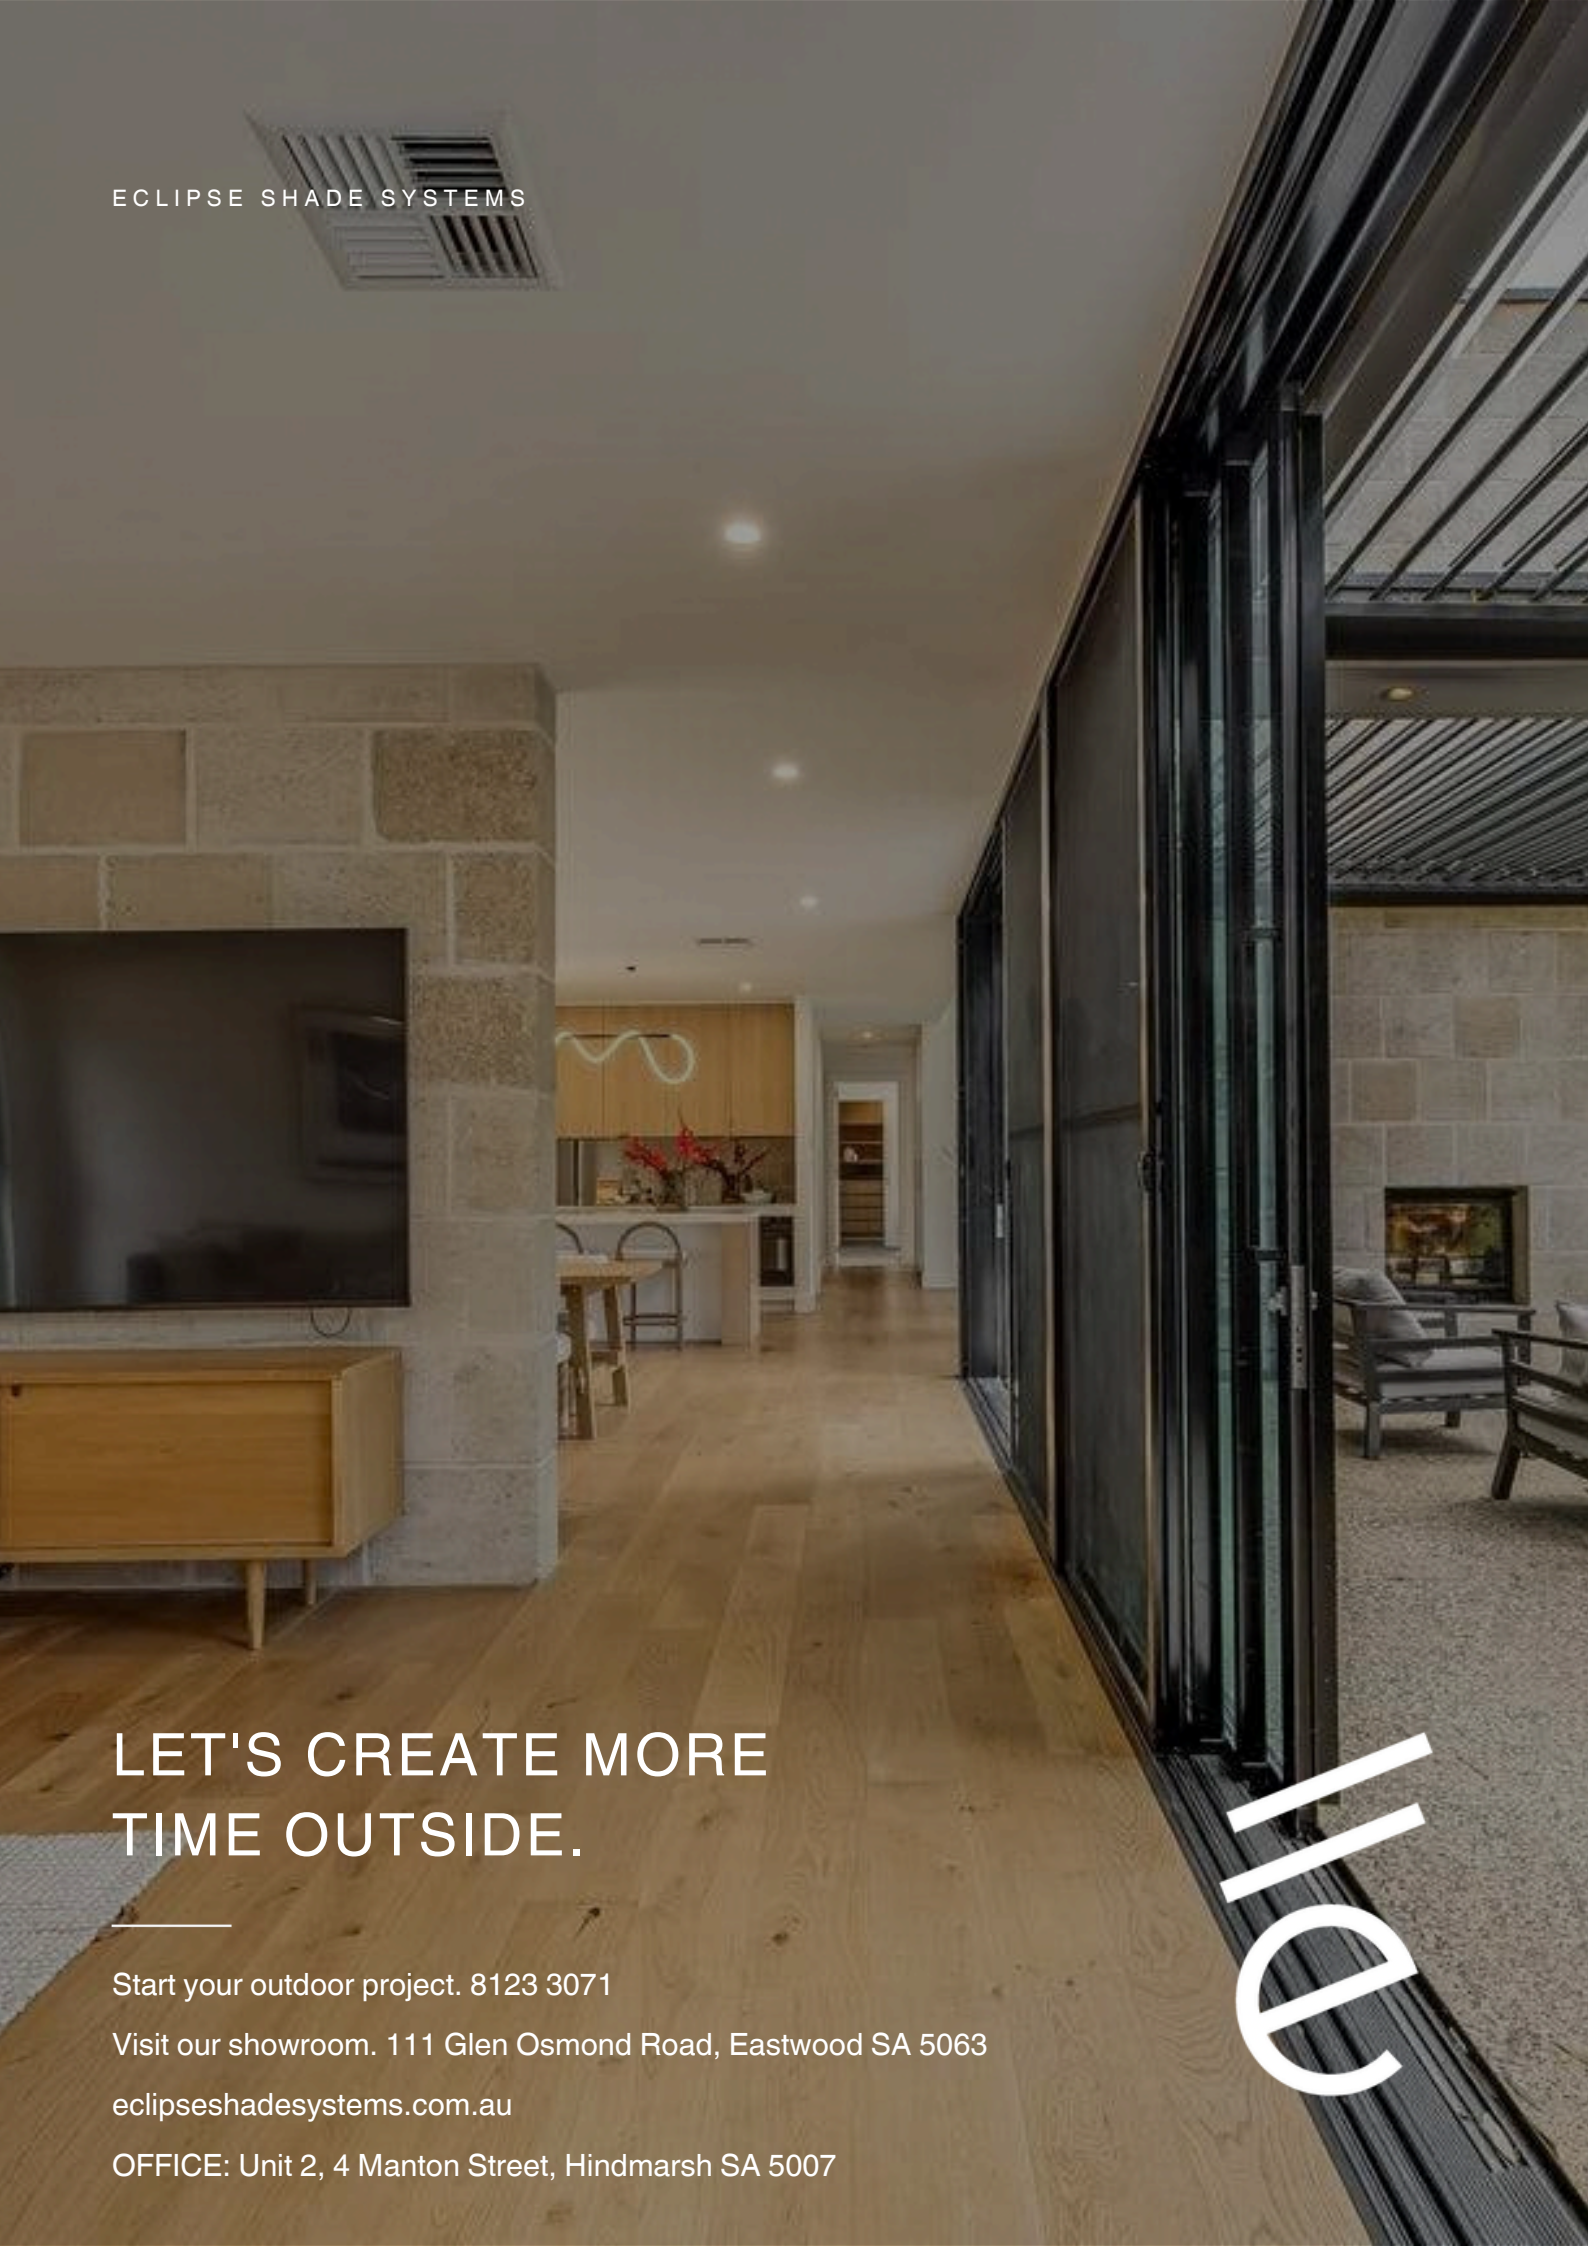

Installed by experienced professionals and qualified and licensed tradesmen with a strong understanding of building and construction.

BUILT FOR SOUTH AUSTRALIA

Systems and materials selected for South Australian sun, heat, wind and rain.

SUPPORT AFTER INSTALLATION

Questions after handover? We're still here.
